

Business Development Intern at

L I N G U E D O 

Linguedo is a social startup that solves inequalities in the European labour market by connecting unemployed people from other European countries with employers in Germany. The German language is the key to bringing both sides together. And that's why we offer a free language course over the course of 9 months for our candidates to be able to start their new life and job. Currently, we are mostly focusing on connecting nurses from Italy and German hospitals.

The Mission

To discover how Linguedo can distinguish itself from the competition. And to aid in the execution of current growth strategies through supporting activities in the departments sales, account management, and operations.

The Outcomes

1. Create an analysis of our top 15 competitors in the nursing personnel sourcing market with a detailed description of each competitor, including business processes, price, language learning approach and sourcing country.
2. Complete at least 10 story points every sprint that have been delegated to you (2-3 medium tasks). What's a story point? You might be asked that in your interview.
3. Find another outcome that you'd like to achieve. ;)
4. Finish the internship with proficiency in at least one skill that you have not had before
5. Hire another intern to take over your job once your internship over
6. BONUS OUTCOME: Become so good at summarizing candidates' CVs that the summaries are approved blindly by the responsible colleagues. Then, we might have a working student job for you.

The Profile

Quick and eager learner – experimenting mindset – high locus of control – fluent in German and English – strong bias for action

The Application

Send your application with cover letter and cv to jobs@linguedo.com.
